

SOFTWARE ENGINEERING: ASSIGNMENT NO. 1

VIEW OF STAKEHOLDERS

PROJECT TITLE: CLOTHING STORE MANAGEMENT SYSTEM

Prepared By:

1. Aadesh Ingle (331001)
2. Ajinkya Chikhale (331004)
3. Ashish Gole (331007)
4. Ayush Bansal (331009)

Stakeholders Involved:

1. Employee
2. Employer
3. Developer

Employee:

- It will reduce the manual calculations done by the employee.
- It will reduce the efforts taken by employee to write the bill.
- Employee wouldn't need to mark the sold product as unavailable as this will be taken care by the software.
- The daily expenses will automatically be added to the Sales Report thus generated.

Employer:

- Employer wouldn't need to calculate the profit manually thus saving time and efforts .
- The sales Report could not be modified by the employee thus giving a sense of security to the Employer.
- The Sales Report would be generated automatically by the software for a specific tenure thus reducing the Employer's efforts.
- The employer doesn't require to create a file marking sold and unsold products.

Developer:

- The developers will learn as how to create a new Application Software.

- The developers will learn the Software Engineering Processes related with the software development.
- The developers can be rewarded by the Clothing Store for which the Application is to be developed.
- The developers will learn how to work in a team.
- The developers will get a better understanding of Database Concepts and the Programming Language used.
